

**Fujikin® Carp Group®**

**V-Lok®**  
Tube Fittings

# As we advance further into the 21st century:

An intelligent integrator for the new age,  
**Fujikin Carp. Group.**

To go beyond the limits.  
Space Environmental Awareness,

**Fujikin Carp. Group.**

Shinya Nojima  
President & COO

## **Fujikin® Carp® Group Technology can be found wherever something is flowing**

The **Fujikin Carp Group** is a leading manufacturer of high-technology products for a wide range of industries. Our corporate policy is to defy boundaries and overcome limitations to technology, and we aim to be number one in every market we serve. Since our beginnings in 1930 as a wholesale dealer of pipe-laying materials and machinery tools, we have evolved into a global leader in the manufacture of specific-purpose valves, as well as precision valves and flow control systems. The **Fujikin Carp Group**'s products are known for their safety and reliability, and they are used throughout the semiconductor, aerospace, shipbuilding, chemical, electric power generation, and biotechnology industries. Our research and production facilities are at the cutting edge of technology, and we actively promote collaboration between industry, academia, and the government.

The **Fujikin Carp Group** is recognized not only as a manufacturer of technologically advanced products, but also as a leading integrated intelligent high-technology innovator. We believe in exploring the creative potential of partnerships with different industries at a global scale. Through these partnerships, we aim to meet the challenges of the twenty-first century. We appreciate your continued business, and we welcome your feedback.

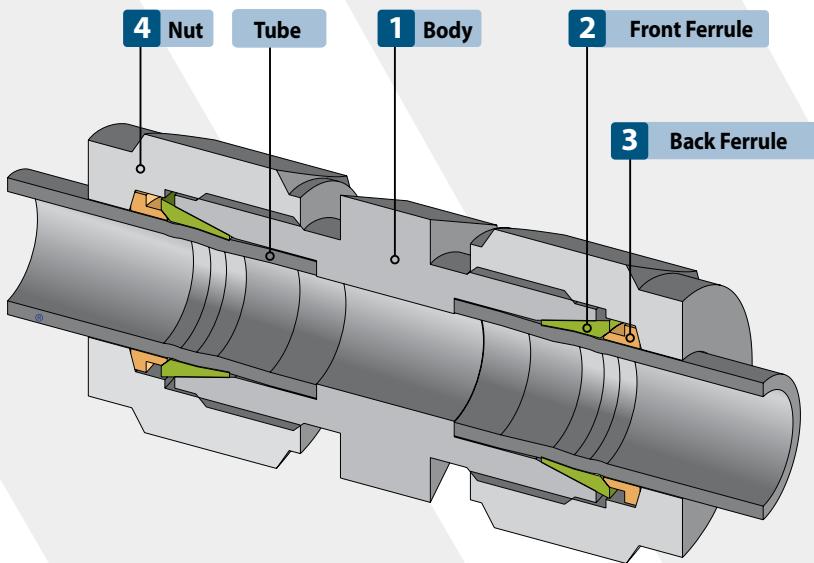

## Overview of V-Lok Tube Fittings

**V-Lok** is a high performance tube fitting that combines the sealing properties and quality control technologies required for power plant instrumentation fittings, other industries, and the ultra-pure construction required used in fittings used in semiconductor manufacturing equipment.

**V-Lok** is new value series that provides high performance, cost effectiveness, and quick delivery.

**V-Lok** tube fittings combine leading edge manufacturing technology and exceptional cost performance.

**V-Lok** Tube Fittings are composed four parts:

1. Body
2. Front Ferrule
3. Back Ferrule
4. Nut

### V-Lok How Does it Works?

The **V-Lok** Tube Fittings is a mechanism used both to seal and to grip tubing. The mechanical advantage and geometry of this kind of fitting produces a leak-tight assembly.

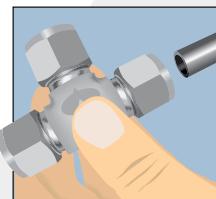

To assemble, simply insert the tube into the complete assembly until the tube bottoms-out against the shoulder of the fitting body (1). The two ferrules are driven forward between the nut (4) and fitting body using the mechanical force created by rotating the nut clockwise. The back ferrule (3) is driven against the tapered rear of the front ferrule (2) and the front ferrule is driven by force into the tapered mouth of the body.

The back ferrule is swaged radially inwards on the tube while lifting the front ferrule out to form a full-faced seal on the tapered surface of the body.

The  $1\frac{1}{4}$  turn of the nut from the hand tight position assures consistent drive of the sealing parts. This ensures an effective seal against high pressure as well as ultra high vacuum conditions.

## V-Lok Installation Instructions

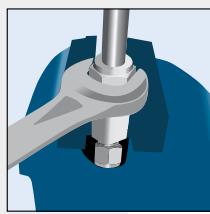

**V-Lok** fittings are supplied assembled and hand tight. Disassembly before use can allow the entry of dirt or other particles.

### Insert the tubing completely into the V-Lok tube fittings.

Check that the tube point contacts with the fitting body shoulder

and that the nut is hand tight until it cannot be tightened further. At this point it is recommended that a scribe mark be drawn on the hex of the nut extending onto the fitting body. This mark will serve as an indicator for the starting point and proper pull-up.

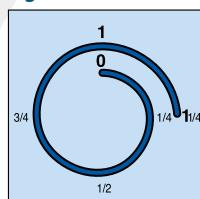

### Tighten the nut.

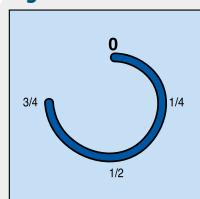

1 1/4 turn of the nut are required for 1/4" (6 mm) and larger fittings (see Fig. A), 3/4 turn of the nut is required for 3/16" (4 mm) and smaller fittings (see Fig. B).

Plug unions (product number: VUJP) and port connectors (product number: VUW-PC): First tighten the nuts manually, and then use a wrench to tighten them a further 1/4 turn only, regardless of size. Assembly is then complete.

**Figure A**

**Figure B**

### Reassembly Instructions

**V-Lok** tube fittings may be disconnected and reconnected repeatedly, without loss of the leak-tight seal.

- Before reassembling the parts, ensure that there is no foreign matter on the sealing diagonal face of the fitting body and the front ferrule.
- Insert the front ferrule until it reaches the body, and then manually tighten the nut enough.
- With a wrench, tighten the nut approximately 1/4 turn. Assembly is then complete.

**Note:**

- After reassembly, the fitting body and nut should return to their original position, or be tightened slightly further.
- For fittings with nominal diameters between 1.6mm (1/16"OD) and 4mm, tighten the nut 1/6 turn.
- For fittings with nominal diameters of 15.88mm (5/8"OD) or larger, it may occasionally be necessary to tighten the nut 1/4 turn or more.
- Don't use the gap inspection gauge for reassembly.

### Before Installation

1. Use an austenitic stainless steel tube with a seamless bright anneal finish, a hardness of Hv200 or less, and a tolerance within  $\pm 0.1\text{mm}$  of the tube O.D.

2. Please refer to "Tubing Data" on page 5 for recommended tube wall thickness.

3. There should be no visible scratches 30mm from either end of the tube. Remove any foreign matter.

4. Scratches on the tube may cause leaks. It is therefore important to handle the tube carefully to reduce the risk of leak. Please do not drag tube when taking out of the shelf and drag on the floor to avoid scratching on the tube.

5. Before assembling the fittings, cut the tubes to the required length.

6. Use a tube cutter to cut the tube. To attain a leak-free connection, the tubing must be cut squarely. A high-quality tube cutter with an appropriate blade for the tubing material is recommended.

If it is necessary to use a different method, for example hacksaw cutting, be sure to cut the tube at a right angle, and then remove burrs carefully from the outer circumference by filing at a 45° angle to the center line.

7. Tube cutter blades should be replaced regularly to maintain sharpness.

8. Before tightening the fitting, ensure that the tube and the fitting are properly aligned.

9. Before tightening the fitting, ensure that its body has been secured using a wrench. Never hold the nut in place while attempting to tighten the body.

### Post-assembly:

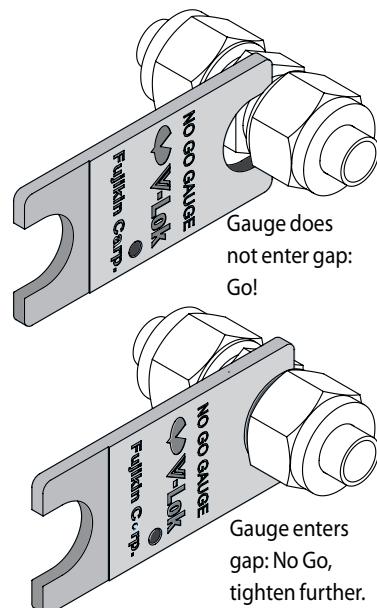

#### Inspection with a "No-Go" gauge (New Fittings Only)

1. Position the "No-Go" gauge next to the gap between the nut and body.

2. If the gauge cannot fit into the gap, the fitting is sufficiently tightened.

3. If the gauge can enter the gap, additional tightening is required.

**Note:** Do not use the "No-Go" gauge on retightened or pre-tightened fittings.

### Ordering Information for the V-Lok "No-Go" gauge

Part No.	Fitting Size
G-VUW- 9.52 x 6.35	1/4", 6mm, 3/8", 8mm
G-VUW- 12.7 x 10	10mm, 1/2", 12mm

**Attention!**

- A small amount of lubricant has been applied to the wetted area of this product. As a result, this product cannot be used in oxygen gas lines or any other high-purity gas lines. Do not remove this lubricant prior to use.
- If you require oil-free ultra-pure compression fittings, use Fujikin's FINELOK fittings. For more information on these fittings, please refer to the FINELOK brochure.

**Fujikin Carp Group**

## Physical Differences And Marking

### V-Lok Metric Fittings:

Tee & Elbow (see Fig. 1)  
 Body marked: MM  
 Straight Connectors: (see Fig. 2)  
 Body: Stepped shoulder  
     marked: F-CARP 316 AV<sup>(1)</sup>  
 Nut: (see Figs.1 & 2) Stepped shoulder  
     marked: V-LOK 316 6M<sup>(2)</sup> SD8<sup>(1)</sup>

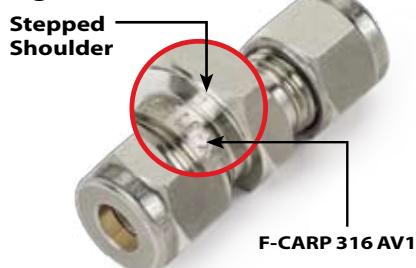

**Fig. 1 Back side**

**V-Lok Tubing Data**
**Table 1: Maximum Allowable Working Pressure Of Stainless Each Tube Wall Thickness**

Tube Wall Thickness mm	inch	0.010- less than 0.012	0.012- less than 0.014	0.014- less than 0.016	0.016- less than 0.020	0.020- less than 0.028	0.028- less than 0.035	0.035- less than 0.049	0.049- less than 0.065	0.065- less than 0.083	0.083- less than 0.095	0.095- less than 0.109	0.109- less than 0.120	0.120
	1/16	5600	6860	8150	9480	12080								
2	1/8						8550	10950						
3	3/16						5500	7100	10300					
6	1/4						4100	5200	7600	10300				
8	5/16							4100	5900	8100				
10	3/8							3350	4850	6550				
12	1/2							2650	3750	5150	6750			
16	5/8								2950	4050	5250	6050		
20	3/4								2450	3350	4250	4950	5850	
22	7/8								2050	2850	3650	4250	4850	
25	1									2400	3100	3600	4200	4700

**Table 2: Factors Used To Determine Allowable Working Pressure At Higher Temperature**

°F	°C	A.I.S.I. 316
200	93	1
400	204	0.96
600	316	0.85
800	427	0.79
1000	538	0.76
1200	649	0.37

To determine allowable pressure at higher temperatures, multiply allowable working pressure from Tables 1 by factors shown in Table 2. For example: The allowable pressure for Type 316 stainless steel, size 1/2" O.D. x 0.049" wall at 800°F(427°C) would be equivalent to 3750 psi x 0.79 = 2962.5 psi. Regarding Min. Nominal Wall Thickness, please refer to Table 3.

**Table 3: Gas Application Tubing**

in		mm	
Tube O.D.	Min. Nominal Wall Thickness	Tube O.D.	Min. Nominal Wall Thickness
1/8" (3.17mm)	0.028" (0.7mm)	3 mm	0.8 mm
3/16" (4.76mm)	0.028" (0.7mm)	6 mm	0.8 mm
1/4" (6.35mm)	0.028" (0.7mm)	8 mm	1 mm
5/16" (7.93mm)	0.035" (0.89mm)	10 mm	1 mm
3/8" (9.52mm)	0.035" (0.89mm)	12 mm	1 mm
1/2" (12.7mm)	0.049" (1.24mm)	14 mm	1.2 mm
5/8" (15.87mm)	0.065" (1.65mm)	16 mm	1.5 mm
3/4" (19.05mm)	0.065" (1.65mm)	18 mm	1.5 mm
7/8" (22.22mm)	0.083" (2.1mm)	20 mm	1.8 mm
1" (25.4mm)	0.083" (2.1mm)	22 mm	2 mm
		25 mm	2.2 mm

For gas applications, we recommend tubing with a greater wall thickness. Table 3 shows the recommended min. wall thicknesses for greater safety and efficiency.

**Attention!** 1. The value of Table 1 is a maximum allowable working pressure calculated from the tube thickness.

The maximum allowable working pressure of the fitting is limited from the value of this table according to the application regulations, and use it, please after considering the application regulations and the standard of used equipment.

2. There is a possibility that the seal decreases remarkably, and consult separately, please when it is used for a long time exceeding 400°C.

### Thermoelement

For ordering: use catalog number of the selected fitting and add the suffix T/C.

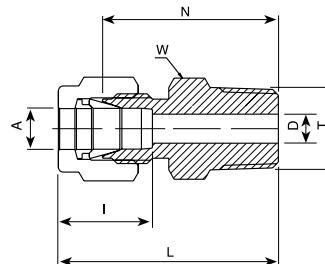

Example: VUWH - 6.35 BN - T/C

"D" - Dimension is minimum hole diameter - dimensions are for reference only, and are subject to change without notice.

### Reference Specifications:

American Standard Pipe Thread (NPT).  
NPT (National Pipe Tapered) is made to specifications outlined in ASNI B1.20.1.

"D" - Dimension is minimum hole diameter - dimensions are for reference only, and are subject to change without notice.

### Reference Specifications:

DIN - 2999

BS - 21

JIS - B0203

ISO - 1/7-BSP-T

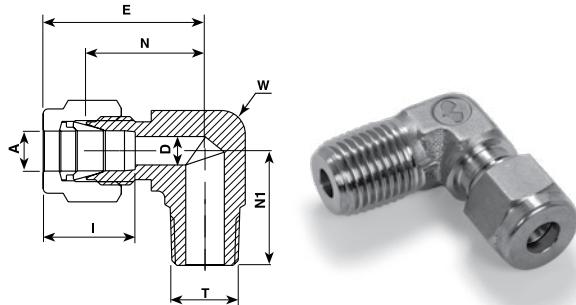

### Designation:

R marking on hex.

"D" - Dimension is minimum hole diameter - dimensions are for reference only, and are subject to change without notice.

## Installation Instructions:

**Figure 1**  
Locking backed off

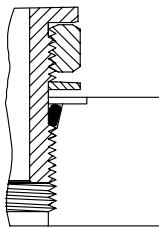

Lubricate the O-ring by inserting it into the groove adjacent to the face of the metal back-up washer which is assembled at the extreme end of the groove as shown in Figure 1.

**Figure 2**  
Fitting install hand tight

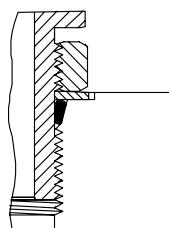

Install the fitting into the S.A.E. straight thread boss, figure 2, until the metal back-up washer contacts the face of the boss as shown in Figure 2.

**Figure 3**  
Fittings backed-off for alignment (1 turn maximum)

Position the fitting by turning it counter clockwise up to a maximum of one turn (see Figure 3).

**Figure 4**  
Fitting locknut tight to appropriate torque

Holding the pad of the fitting with a wrench, tighten the locknut and washer against the face as shown in Figure 4.

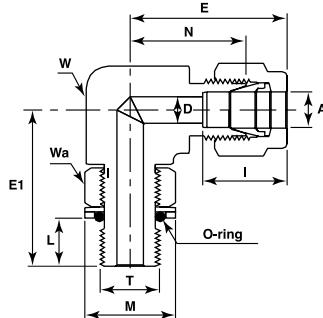

"D" - Dimension is minimum hole diameter - dimensions are for reference only, and are subject to change without notice.

## ISO Parallel Thread (Reference)

Mounting Dimensions Of Connectors				
T	D4		C	
	in	mm	in	mm
G1/8	0.53	13.5	0.28	7

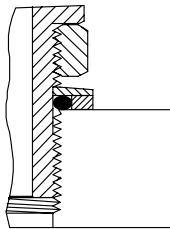

### Installation Instructions:

**Figure 1**  
Locking backed off

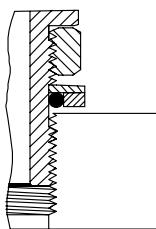

Set the O-ring by inserting it into the groove adjacent to the face of the metal back-up washer which is assembled at the extreme end of the groove as shown in Figure 1.

**Figure 2**  
Fittings install hand tight

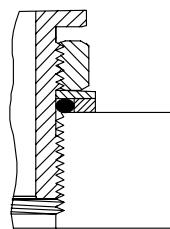

Install the fitting into the ISQ straight thread boss until the metal back-up washer contacts the face of the boss as shown in Figure 2.

**Figure 3**  
Fittings backed-off for O-ring alignment  
(1 turn maximum)

Position the fitting by turning it counter-clockwise up to a maximum of one turn. See Figure 3.

**Figure 4**  
Fittings locknut tight to appropriate torque

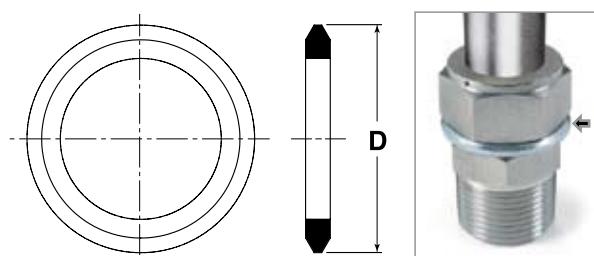

Holding the body of the fitting with a wrench, tighten the locknut and washer against the face as shown in Figure 4.

### Stop Collar

V <sub>®</sub> -LOK		D	
in	mm	in	mm
1/4	6.35	0.69	17.5
3/8	9.52	0.84	20.6
1/2	12.7	1.1	27
3/4	19.05	1.31	33.3
1	25.4	1.68	42.7

1. Remove the nut and ferrules from the fitting.
  2. Insert the stop collar.
  3. Assemble the nut and ferrules until hand tight.
  4. Tighten the fitting until the stop collar no longer rotates (by hand).
- At this stage the fitting is tightened correctly.

### Ordering Information For Assembled Stop Collar (With Fitting)

## FINE BUBBLE® Leak Detection Fluid

### Concentration of Impurities (Units: ppm)

Impurities	Na	K	Ca	Cl	F
Concentration	<1	<1	<1	<1	<1

Ordering No.	Container Size	Quantity per Pack	Container
LL-S-1	60cc	6 bottles/pack	Squeeze bottle
LL-M-1	300cc	1 bottle/pack	Squeeze bottle with nozzle cap
LL-L-1	4 l	1 container/pack	Refill container

### Features

- With its viscosity and rapid foaming action, FINE BUBBLE® detects the smallest leaks even when it is applied in small amounts.
- Noncorrosive; does not react with metal, coatings, rubber, or plastic surfaces.
- Dries clean and without staining.
- Minimal impurities such as sodium, potassium, calcium, chlorine, fluorine, bromine, and sulfur compounds.
- Nonflammable; does not react with oxygen.
- Available in three convenient sizes: 60cc (squeeze bottle), 300cc (squeeze bottle with nozzle cap), and 4L (refill container).
- Read the instructions carefully before use.

### FINE BUBBLE® Test Data

#### Corrosion Test Results

Tube Material (25 x 50 x 15t #400 finish)	Leak Detection Fluid			
	FINE BUBBLE®	Brand B	Brand C	Duration
S55C	○	X3	X3	24 hours
A1050P	○	○	△120	120 hours
C2801P	△3	△3	△3	120 hours
SUS304	○	○	○	120 hours

Key: ○: Almost no changes at the end of the test

△: Discolored or slightly corroded

x : Corroded

\* Numbers next to the icon indicate when (in terms of hours) changes to the metal were visually observed.

#### Immersion Corrosion Test

The metal samples were immersed in the leak detection fluids at 30°C and inspected for changes.

FINE BUBBLE®

Brand B

Brand C

S55C samples after 24 hours of immersion in the leak detection fluids
