

*Dear colleagues,*

*It is a pleasure to address you today on this special occasion, on our 20th Anniversary. May I congratulate you and all those who at different times have worked at our company and contributed towards building VSP.*

*To some of us, work at VSP is a personal life story of 20 years. We often address «biographies» of companies which enjoy world-wide recognition and sometimes forget that their origins are underlaid by efforts of individual enthusiasts who started under rather modest conditions, as well as by persistent work of the team sharing the same ideas.*

*20 years is a relatively young age, but the world and our business environment are changing so quickly that often one may count a year for two. We have been working and continue to not being distracted by opportunistic considerations of the moment, but learn, grow and change in line with the environment. The main asset of the VSP company is people whose business attitude help the company to progress.*

*Today we understand better that technical achievements of modern engineering which we are dealing with make us more accountable to our partners and require continuous professional advancement. We work hard to improve ourselves and trust that 20 years to come will be successful for us!*

*Once again let me congratulate our company, thank for achievements in the first two decades and wish good luck and success!*

*Sincerely yours,*

*Victoria I. Perepelyatnik  
VSP Company Shareholder*

*Dear colleagues,*

*Today, 19th September 2016, is an important day for our team.  
Today we are celebrating VSP 20-years!*

*On such a day there is a tradition to sum up, to speak about achievements and new plans for future. It is true, we have achievements which we would like to share, and a lot of tasks to be carried out.*

*The road to go is always attractive promising something unknown which would allow to acquire earlier inaccessible knowledge and get new impressions and discoveries. The team which continues to build on its history and has gained business experience, is capable of choosing the right way - the way leading the company to success, to new opportunities, - will be the winner.*

*I would like to congratulate the shareholders, company members with a VSP birthday, wishing to retain perhaps one of the most valuable qualities of our team - a strive to develop and move forward to new challenges and opportunities.*

*Happy birthday VSP!*

*Sincerely yours,*

*Oxana S. Klochenko  
General Director*

The logo consists of the letters 'VSP' in a large, bold, sans-serif font. The 'V' is colored orange, while the 'S' and 'P' are dark grey.

# VSP Company

An engineering solution becomes really valuable when it features unique qualities, when its capabilities provide for technical advantage of the user and considerably cut down expenses - optimise time and financial resources - allowing for stronger competitive position of business.

*A new generation of Ermeto EO-3 fittings by Parker is a unique development by a VSP partner-manufacturer. This solution allows for faster and quality guaranteed assembling a hydraulic connector system.*

*Gecma, a division of MTL Instruments, in 2014 presented a new remote computer terminal Gecma RT for hazardous zone, with an absolute advantage for the user - a modular concept of the terminal provides for extended functionality and ease of maintenance in the hazardous zone itself.*

*Emerson, who came into possession of a Solartron brand, in 2014 announced an upgrade of a complete product line of liquid and gas parameter meters - density and viscosity meters with an international reputation for reliable and highly accurate instruments. Engineering expertise of Emerson merged with unique competence of Solartron solutions allow for higher measurement accuracy and offer field instruments capabilities of a new quality calibre to the user.*

*A modular Versadac recorder - a Eurotherm technical solution - represents an integrated data logging system for a critical process with minimum investments required today, and flexible planning for future extension.*

VSP purpose and intention is to present to the customer technologies based on world-level engineering achievements - from a «simple» fitting to high-tech data processing systems - industrial computers, input-output systems and other up-to-date solutions. Marketing and distribution is the main profile of VSP.

Comprehensively investing every year in VSP development, in professional advancement of specialists, we strive to work at a new level, keeping in mind basic principles - competence, professionalism, quality and long-term strategy.

Creating special working conditions for the team, allowing to realise potential of its every member, we want to provide for confident stand in life for every person working at VSP.

A modern market makes high-level demands on all those involved in business. We believe that building an open and long-term relationship within the company, with customers and partners present to VSP possibilities for implementing plans for the company development.
